

TRUCK-TRAILER REMOTE KEYLESS LOCKING DEVICE (ACTUATOR)

Model: 1272

This reliable and rigid internal motorized electromechanical lock is dedicated for remote and keyless locking/ unlocking the cargo doors of vans, dry and refrigerated box- trucks, trailers. The internal locking system bears the ICEBREAKER feature and prevents lock from getting stuck at low temperatures and humidity.

It can be easily connected to the tracking device that is already integrated into any GSM/GPS vehicle tracking or telematics system.

The locking device is E-mark and EAC certified.

TECHNICAL DETAILS

Supply voltage, VDC	9...32
Operational temperature, °C	-30...+85
Polarity inversion protection	Yes
Bolt force, N (icebreaking mode)	Max 300
